

SURFACE ASSURANCE

1 - 2 - 3 Surface Preparation

For a successful surface restoration which includes sealer application, the cleaning process utilized is very important and properly sets the stage for optimal sealing conditions.

Choose a professional contractor that will attack stains and clean the surface overall with Trident professional grade cleaners and equipment designed to improve the aesthetics as well as prepare the surface for ideal sealer adhesion.

1 Efflorescence Treatment

Utilizing Trident's White Water will treat and remove any efflorescence present on the surface overall.

2 Organic Stain Removal

Tough organic stains and biological growth are tackled with Trident's Point Break.

3 Overall Surface Clean

Trident's Wipe Out will lift and remove embedded dirt and grime with its proprietary Clean Rinse Technology. Wipe Out's neutralizing qualities will ensure maximum adhesion for Trident's sealers.
